

EventHub UI/UX Design Specification

Complete Design Document for Website & Mobile App – End User/Visitor Flows

Project: EventHub – Event Discovery & Ticketing Marketplace

Document Type: UI/UX Design Specification

Target Audience: UI/UX Design Team

Scope: End-User/Visitor Flows Only (Attendees)

Date: February 2026

Version: 1.0

1. Executive Summary

This document provides comprehensive UI/UX specifications for **EventHub**, an event discovery and ticketing marketplace platform serving **Egypt** and **Saudi Arabia**. The platform connects event organizers with attendees through a **mobile-first, bilingual (Arabic/English)** interface.

This specification focuses exclusively on **end-user/visitor flows** (attendees discovering and booking events), and does not cover organizer dashboards or admin panels.

1.1 Design Principles

Mobile-First:

Over 70% of ticket purchases occur on mobile devices[1]. All features must be optimized for mobile screens first, then adapted for larger displays.

Speed & Clarity:

Users should discover relevant events in under 30 seconds. Every

screen should have a single primary action with minimal cognitive load.

Cultural Relevance:

Design must accommodate both Arabic (RTL) and English (LTR) layouts, with culturally appropriate imagery, color psychology, and interaction patterns for Middle Eastern users.

Trust & Transparency:

Clear pricing, verified organizer badges, secure payment indicators, and transparent booking terms build user confidence[2].

Accessibility:

WCAG 2.1 AA compliance minimum, with considerations for color contrast (4.5:1 for body text), keyboard navigation, screen reader compatibility, and touch target sizes (minimum 44×44px)[3].

2. Platform Overview

2.1 Platforms & Devices

Platform	Specifications
iOS Mobile App	iPhone 8 and newer (iOS 14+)
Android Mobile App	Android 8.0+ (API 26+)
Responsive Web	Desktop (1280px+), Tablet (768-1024px), Mobile Web (375-767px)

Table 1: Supported platforms and minimum specifications

2.2 User Personas

Persona 1: Active Event Enthusiast (Ahmed, 26, Cairo)

- Attends 2-4 events per month
- Interests: Music, networking, tech meetups
- Behavior: Discovers events via social media, values quick booking
- Pain points: Too many platforms, no centralized discovery

Persona 2: Casual Family Event-Goer (Fatima, 34, Riyadh)

- Attends family-friendly events quarterly
- Interests: Cultural festivals, kids' activities, food events
- Behavior: Plans ahead, researches thoroughly, budget-conscious
- Pain points: Unclear event details, hidden fees, safety concerns

Persona 3: Professional Conference Attendee (Khaled, 31, Alexandria)

- Attends 1-2 professional events monthly
 - Interests: Business conferences, workshops, training
 - Behavior: Books early, values networking opportunities
 - Pain points: Complex registration, poor event information
-

3. Information Architecture

3.1 Primary Navigation Structure

Mobile App Navigation (Bottom Tab Bar):

- └— Home (Discover)
- └— Search/Explore
- └— Bookings (My Events)
- └— Profile/Account

Website Navigation (Top Header):

- └— Discover Events
- └— Browse (Categories/Map)
- └— My Bookings
- └— Login/Profile

3.2 User Flow Map

- **Discovery Flow:** Launch → Home/Feed → Event Detail → RSVP/Ticket Selection → Checkout → Confirmation
 - **Search Flow:** Search Entry → Apply Filters → Browse Results → Event Detail → Booking
 - **Social Flow:** Event Detail → Share → Social Platforms / Friends
 - **Account Flow:** Profile → Edit Settings → View Bookings → Ticket Access
-

4. Complete Page Specifications

4.1 Launch Screen (Mobile App Only)

Purpose: Brand introduction and loading state during app initialization.

Duration: 2-3 seconds maximum

Layout Specifications:

- Full-screen centered EventHub logo
- Brand gradient background (teal to deep blue recommended for trust and energy)
- Loading spinner (subtle animation) below logo
- App version number in bottom corner (8pt, low opacity)

Design Considerations:

- No interactive elements during loading
 - Smooth transition to next screen (fade/slide)
 - Support both light and dark mode variants
-

4.2 Onboarding Screens (First Launch)

Purpose: Welcome new users, communicate value proposition, request essential permissions.

Number of Screens: 3 screens maximum (industry best practice shows completion rates drop after 3 slides)[4]

Screen 1: Welcome & Value Proposition

- **Headline (Arabic):** "اكتشف كل فعاليات مدينتك في مكان واحد"
- **Headline (English):** "Discover All Events in Your City in One Place"
- **Visual:** Illustration showing diverse event types (music, sports, culture, tech)
- **Subtext:** Brief benefit statement (15-20 words max)

Screen 2: Key Features

- **Headline:** "احجز تذكرتك في ثوانٍ / Book Tickets in Seconds"
- **Visual:** Phone mockup showing quick booking flow
- **Feature highlights:**
 - Instant booking confirmation
 - Map-based discovery
 - Personalized recommendations

Screen 3: Permissions & Setup

- **Headline:** "خصّص تجربتك / Personalize Your Experience"
- **Location Permission Request:** Explain why (find nearby events)
- **Notification Permission Request:** Explain benefits (event reminders, updates)
- **CTAs:**
 - Primary: "ابدأ الاستكشاف / Start Exploring" (large, prominent)
 - Secondary: "تخطي / Skip" (text link, less prominent)

Navigation Controls:

- Progress indicators (3 dots) at bottom
- "Next" button (right side for LTR, left for RTL)
- "Skip" option available on all screens
- Swipe gestures supported

Best Practices Applied:

- Keep text minimal (under 50 words per screen)[5]
- Use illustrations instead of screenshots for universal appeal
- Allow users to skip without penalty
- Never block access to core features

4.3 Home Screen (Main Discovery Feed)

Purpose: Primary landing screen for event discovery, personalized content delivery, quick access to key features.

Layout Structure (Mobile):

1. Header Section:

- Location indicator with city name (tappable to change)
- Search bar (tap to open full search interface)
- Notification bell icon (with badge for unread)

2. Quick Filters Horizontal Scroll:

- Pill-shaped filter chips: "This Weekend", "Today", "Free Events", "Near Me"
- Custom date picker accessible via calendar icon
- Horizontal scroll for additional filters

3. Featured Events Carousel:

- Large hero cards (full width minus padding)
- Auto-advancing carousel (5-second intervals, pausable)
- Each card shows:
 - Event hero image (16:9 aspect ratio)
 - Event name overlay (bottom third, gradient backdrop)
 - Date badge (top-left corner)
 - "Featured" badge (top-right corner)
- Pagination dots below carousel

4. Category Quick Access:

- Grid of category icons (4 columns on mobile)
- Icon + label format
- Categories: Music, Sports, Arts, Food, Tech, Family, Business, Nightlife
- Custom icons with consistent style

5. Recommended For You Section:

- Section header with "See All" link
- Horizontal scrolling card list
- Each card (compact format):
 - Square event image (1:1 ratio)
 - Event name (2 lines max, ellipsis)
 - Date and time (icon + text)
 - Location (icon + text, truncated)
 - Price badge or "Free" indicator
 - Bookmark icon (top-right, toggleable)

6. Nearby Events Section:

- Similar card format to Recommended
- Distance indicator on each card (e.g., "1.2 km away")
- Sorted by proximity

7. Popular This Week Section:

- Full-width list cards (vertical scroll)

- Each card shows:
 - Landscape event image (left side, 40% width)
 - Event details (right side, 60% width):
 - * Event name
 - * Category tag
 - * Date/time
 - * Location
 - * Attendance count or "trending" indicator
 - * Price

8. Footer Navigation (Bottom Tab Bar):

- Fixed bottom bar with 4 tabs
- Icons with labels below
- Active state indicated by color + icon fill

Desktop Web Adaptations:

- Header becomes horizontal navigation bar
- Featured carousel maintains prominence (hero section)
- Category grid expands to 6-8 columns
- Multiple sections visible simultaneously (no infinite scroll)
- Sidebar for filters (persistent, not modal)

Interaction Patterns:

- Pull-to-refresh on mobile
- Infinite scroll for main feed
- Tap any card to navigate to Event Detail
- Tap bookmark icon to save event (instant feedback, no navigation)
- Tap filter chip to refine results (updates feed dynamically)

Performance Considerations:

- Lazy load images as user scrolls
- Cache recent searches and location data
- Prefetch event details for above-the-fold content
- Maximum 20 events loaded initially, paginate thereafter

Empty States:

- If no nearby events: Show illustration + "No events nearby" message + "Browse All Events" CTA
 - If personalization data insufficient: Show generic popular events
 - If network error: Show cached content + "Offline" indicator + "Retry" button
-

4.4 Search & Explore Screen

Purpose: Advanced discovery through keyword search, filtering, and map-based exploration.

Search Entry State:

- Large search input field at top
- Placeholder text: "بحث عن فعاليات... / Search for events..."
- Search icon (left in LTR, right in RTL)
- Voice search icon (opposite side)
- Recent searches below (last 5, clearable)
- Trending searches section (curated keywords)
- Popular categories (shortcuts to filtered results)

Active Search State (As User Types):

- **Dynamic Search Results:**
 - Auto-complete suggestions appear instantly
 - Results categorized:
 - * Events (name matches)
 - * Venues (location matches)
 - * Organizers (profile matches)
 - * Categories (tag matches)
 - Maximum 5 results per category
 - Highlight matching keywords in bold
- Cancel/Clear button appears in search bar
- Keyboard dismissible by tapping outside or scrolling

Search Results View:

Component	Specifications
Results Header	"X events found" + "Sort by" dropdown (Relevance, Date, Distance, Price)
Filter Button	Prominent button showing number of active filters
Result Cards	Same format as Home feed recommended cards
View Toggle	Grid view / List view switcher (icon buttons)
Map View Option	"Show on Map" floating button

Table 2: Search results interface components

Filter Panel (Modal on Mobile, Sidebar on Desktop):

Filter panel opens as full-screen modal on mobile with following sections:

1. Date & Time:

- Today, Tomorrow, This Weekend, This Week (quick picks)
- Custom date range picker (calendar interface)
- Time of day: Morning, Afternoon, Evening, Night (multi-select)

2. Location:

- Current location (default, with distance radius slider)
- Specific areas/neighborhoods (multi-select checklist)
- Venue name search

3. Category:

- Full category list with icons
- Multi-select checkboxes
- Collapsible subcategories where applicable

4. Price:

- Free events only (toggle)
- Price range slider (min/max in local currency)
- Show currency symbol and values

5. Event Type:

- Online events
- In-person events
- Hybrid events

6. Additional Filters:

- Family-friendly (toggle)
- Wheelchair accessible (toggle)
- Parking available (toggle)
- Food & drinks included (toggle)

Filter Panel Footer:

- Clear all filters (text link, left)
- Apply button (primary CTA, right)
- Show count of matching events in Apply button ("Show 47 Events")

Map View Interface:

- Full-screen interactive map (Google Maps or Mapbox)
- Event location pins (color-coded by category)
- Cluster markers for dense areas (with count badge)
- Tapping pin shows mini event card overlay:
 - Event thumbnail image
 - Event name
 - Date and start time
 - Price
 - "View Details" button
- Map controls:
 - Zoom buttons
 - Center on user location button
 - Map style toggle (standard/satellite - optional)
- List view toggle button (bottom, floating)
- Filter button remains accessible

Best Practices Applied:

- Search suggestions load in under 200ms[6]
 - Maximum 3 levels of filter depth to avoid complexity[7]
 - Display active filter count prominently to maintain context
 - Allow batch filtering (select multiple, then apply) vs. instant filtering based on user preference
 - Show "no results" state with suggestions to modify filters
-

4.5 Event Detail Page

Purpose: Comprehensive event information to enable informed booking decisions.

Page Structure (Scrollable):

1. Hero Section:

- Full-width event cover image (landscape, 16:9 ratio)
- Image carousel if multiple photos (swipeable, with indicators)
- Back button (top-left overlay)
- Share button (top-right overlay)
- Bookmark button (top-right, next to share)

2. Event Header:

- Event name (H1, bold, 2-3 lines max)
- Category tag (pill, colored)
- Verified organizer badge (if applicable)
- Organizer name (tappable to view profile)
- Overall rating stars + review count (if reviews enabled)

3. Key Information Cards:

Date & Time Card:

- Calendar icon
- Day, date, month, year
- Start time - End time
- "Add to Calendar" link (exports .ics file)

Location Card:

- Pin icon
- Venue name (bold)
- Full address (tappable to open maps)
- Distance from user (if location enabled)
- Mini static map preview (tappable for full map)

Pricing Card:

- Tag icon
- Price range or "Free" indicator
- Available ticket types listed (if multiple)
- "View Tickets" button if pricing varies

4. About This Event Section:

- Section header
- Full event description (formatted text)
- "Read More" expansion if description exceeds 200 words
- Event highlights/tags (interactive pills)
- Language of event (if relevant)

5. What to Expect Section (Optional):

- Bulleted list of inclusions
- Duration
- Dress code (if applicable)
- Age restrictions (if any)

6. Organizer Section:

- Organizer profile photo
- Organizer name and bio (truncated)
- "View Profile" button
- "Follow" button (if logged in)
- Past events count

7. Location Map Section:

- Interactive embedded map
- Event pin marker
- "Get Directions" button
- Nearby parking info (if available)

8. Similar Events Section:

- "You might also like" header
- Horizontal scrolling cards (same format as home feed)
- Algorithm: Same category + similar date + nearby location

9. Reviews & Ratings Section (Post-Event):

- Average rating display (stars + number)
- Review count
- Filter reviews (Most Recent, Highest Rated, Lowest Rated)
- Individual review cards:
 - User avatar (anonymous if preferred)
 - User name
 - Star rating
 - Review text
 - Helpful votes
 - Date posted
- "Write a Review" button (if user attended)

10. FAQs Section (Accordion):

- Common questions with expandable answers
- Examples: Refund policy, What to bring, Contact organizer

11. Terms & Policies:

- Refund policy summary
- Link to full terms
- Safety guidelines (if applicable)

Fixed Bottom Action Bar (Mobile):

Element	Specifications
Price Display	Large, prominent price (left side) or "Free"
Availability Indicator	"X tickets left" or "Sold Out" badge
Primary CTA Button	"Get Tickets" or "RSVP Free" (right side, 60% width)
Button States	Enabled (primary color) / Sold Out (gray) / Past Event (disabled)

Table 3: Bottom action bar components

Desktop Adaptations:

- Two-column layout: Left (images + description), Right (sticky booking card)
- Sticky sidebar with booking options, always visible during scroll
- Larger map section
- Reviews displayed in paginated grid

Interaction Details:

- Tapping "Get Tickets" navigates to Ticket Selection screen
- Tapping "RSVP Free" shows confirmation modal (no checkout required)
- Tapping "Share" opens native share sheet (WhatsApp, Instagram, Copy Link, etc.)
- Tapping "Bookmark" saves to user's collection (visual feedback, no navigation)
- Tapping organizer name/photo navigates to Organizer Public Profile

- Tapping address opens Google Maps / Apple Maps with directions

Loading States:

- Show skeleton screens for content blocks while loading
- Progressive image loading (blur-up technique)
- Fallback placeholder if images fail to load

Error States:

- If event not found: "Event Unavailable" message + "Browse Similar Events" CTA
 - If event canceled: Prominent cancellation banner at top + refund information
-

4.6 Ticket Selection Screen

Purpose: Allow users to select ticket types, quantities, and proceed to checkout.

Header:

- Event name (truncated if long)
- Event date and time
- Back button
- Progress indicator: Step 1 of 3 (Select Tickets)

Ticket Types List:

Each ticket type displayed as a card:

- **Ticket Name** (e.g., "General Admission", "VIP Pass")
- **Price** (prominent, right-aligned)
- **Description** (brief, 1-2 lines)
- **Availability Status:**
 - "X tickets remaining" (if low stock)
 - "Available" (if ample stock)
 - "Sold Out" (grayed out, not selectable)
- **Quantity Selector:**
 - Minus button (-)
 - Quantity display (center)

- Plus button (+)
- Maximum per user limit displayed if applicable
- **Special Badges:**
 - "Early Bird" with countdown timer
 - "Limited" for exclusive tickets
 - "Best Value" for promotional tickets

Seating Map (For Seated Events):

- Interactive venue seating chart
- Color-coded seat availability:
 - Available (selectable color)
 - Selected by user (highlighted color)
 - Reserved/sold (grayed out)
 - Wheelchair accessible (special icon)
- Zoom controls for detailed view
- Legend explaining color codes
- Seat details on selection (Section, Row, Seat Number, Price)
- "Select X Seats" active count indicator

Promo Code Section (Collapsible):

- "Have a promo code?" expandable field
- Input field for code entry
- "Apply" button
- Validation feedback (success: green checkmark + discount applied, error: red message)

Order Summary (Sticky Bottom Card on Mobile):

Line Item	Details
Tickets	Ticket type × quantity, subtotal per type
Subtotal	Sum of all ticket prices
Service Fee	Percentage or flat fee (clearly labeled)
Taxes	VAT/GST breakdown
Discount	Applied promo code discount (if any)
Total	Final amount in bold

Table 4: Order summary breakdown

Action Buttons:

- Secondary: "Cancel" or "Back to Event" (text link)
- Primary: "Continue to Checkout" (large button, enabled only when tickets selected)

Validation & Error Handling:

- Maximum tickets per order (typically 10) - show message if exceeded
- Timer for held seats (if applicable): "Seats held for 10:00 minutes"
- Inventory updates in real-time - show toast if selected tickets become unavailable
- Clear error messages: "VIP tickets sold out while selecting. Please choose another option."

Accessibility Considerations:

- Announce quantity changes to screen readers
- Keyboard navigation for increment/decrement buttons
- High contrast mode support for seat map

4.7 Checkout Screen

Purpose: Collect attendee information, payment details, and complete booking.

Progress Indicator:

Step 2 of 3: Checkout (or combined Step 2/3 for streamlined flow)

Page Sections:

1. Attendee Information Form:

For Free Events (RSVP):

- Full Name (required)
- Email (required)
- Phone Number (optional, with country code selector)
- Checkbox: "Send me event updates" (opt-in)

For Paid Events:

- Full Name (required, per ticket or single for all)
- Email (required, ticket sent here)
- Phone Number (required for entry/confirmation)
- Additional fields if organizer requires:
 - Age/Date of Birth (for age-restricted events)
 - Company/Organization (for B2B events)
 - Dietary restrictions (for food events)

Form Best Practices Applied:

- Single-column layout[8]
- Clear field labels above inputs
- Autofill enabled (name="name", autocomplete attributes)
- Real-time validation (email format, phone number)
- Error messages inline below fields (red text + icon)
- Input focus states clearly visible
- Guest checkout option (no account required)[9]
- "Save for future bookings" checkbox (if logged in)

2. Payment Information (Paid Events Only):

Payment Method Selection:

- Credit/Debit Card (Visa, Mastercard, Amex logos)
- Digital Wallets (Apple Pay, Google Pay, Samsung Pay)
- Local payment methods:
 - Egypt: Fawry, Vodafone Cash, Mobile Wallets
 - Saudi Arabia: Mada, STC Pay, Tabby (BNPL)

Card Payment Form:

- Card number (with card type detection and icon display)
- Expiry date (MM/YY format)
- CVV/CVC (with help tooltip explaining location)
- Cardholder name
- Billing address (optional or required based on payment gateway)
- Save card for future use (checkbox, with secure storage notice)

Security Indicators:

- SSL padlock icon
- "Secure Payment" badge
- PCI DSS compliance logo
- "Your payment info is encrypted" text

3. Order Summary (Sidebar on Desktop, Collapsible on Mobile):

Display same details as Ticket Selection screen, but read-only with edit option:

- Event thumbnail
- Event name and date
- Ticket breakdown
- Price breakdown (subtotal, fees, taxes, total)
- "Edit Tickets" link (returns to previous screen)

4. Terms Acceptance:

- Checkbox: "I agree to EventHub's Terms of Service and Privacy Policy"
- Links to terms open in modal/new tab
- Checkbox: "I agree to the organizer's event terms and cancellation policy"
- Link to event-specific terms

5. Marketing Consent (Optional):

- Checkbox: "Send me updates about similar events"
- Separate from required terms for GDPR compliance

Action Buttons:

- Back button (returns to ticket selection, preserves data)
- Primary CTA: "Complete Booking" or "Pay Now" with total amount
 - Button loading state with spinner during processing
 - Button disabled until all required fields valid

Error Handling:

- Payment declined: Clear error message + "Try different payment method" option
- Session timeout: Warning modal before expiry + "Extend Time" button
- Network error: "Connection lost. Your data is saved. Please retry." + Retry button
- Validation errors: Scroll to first error + highlight invalid fields

Mobile-Specific Optimizations:

- Numeric keyboard for phone/card number fields

- Autofill suggestions for saved payment methods
 - Biometric authentication for stored cards (Face ID/Touch ID)
 - Large tap targets for all buttons (minimum 44×44px)[10]
-

4.8 Booking Confirmation Screen

Purpose: Confirm successful booking, provide ticket access, and guide next steps.

Visual Hierarchy:

1. Success Indicator:

- Large checkmark icon (animated, green)
- Success headline: "تم الحجز بنجاح! / Booking Confirmed!"
- Confirmation number (bold, large font, copyable)

2. Event Summary Card:

- Event cover image
- Event name
- Date, time, and location
- Ticket quantity and type
- QR code preview (if e-ticket)

3. What Happens Next Section:

- "تحقق من بريدك الإلكتروني / Check Your Email"
 - Email confirmation sent to [user email]
 - Includes PDF tickets and calendar file
- "أضف إلى التقويم / Add to Calendar"
 - Prominent button to save event to device calendar
- "تذاكر جاهزة / Your Tickets Are Ready"
 - Access tickets from "My Bookings" tab
 - Show tickets at venue for entry

4. Order Details (Expandable):

- Attendee information
- Payment method used
- Transaction ID
- Amount paid (full breakdown)
- Refund policy summary
- Download receipt link

5. Action Buttons:

- Primary: "View My Tickets" (navigates to ticket detail)
- Secondary: "Share Event" (social sharing)
- Tertiary: "Back to Home" (returns to feed)

6. Help & Support:

- "Need help?" section
- Links: Contact Organizer, Contact Support, View FAQs
- Customer support hours display

7. Suggested Events (Optional):

- "Other events you might like" carousel
- Similar events based on category/location

Email Confirmation Content (Reference for Consistency):

Email should mirror confirmation screen information:

- Success message
- Event details
- Ticket attachment (PDF with QR code)
- Calendar file (.ics) attachment
- Add to wallet options (Apple Wallet, Google Pay)
- Contact information
- Cancellation/refund policy link

4.9 My Bookings Screen

Purpose: Central hub for users to access all their upcoming, past, and canceled bookings.

Tab Navigation:

- **Upcoming** (default active tab)
- **Past**
- **Canceled/Refunded**

Upcoming Events View:

Each booking displayed as a card:

- Event cover image (left side, square thumbnail)
- Event details (right side):
 - Event name (bold)

- Date and time (with countdown: "In 3 days")
- Location (truncated if long)
- Ticket quantity (e.g., "2 tickets")
- Status indicator:
 - "Confirmed" badge (green)
 - "Pending" badge (yellow, if payment processing)
 - "Action Required" badge (red, if issue with booking)
- Primary action button: "View Tickets"
- Secondary actions (overflow menu):
 - Add to Calendar
 - Get Directions
 - Contact Organizer
 - Cancel Booking (if eligible)

Sorting & Filtering:

- Sort by: Date (soonest first - default), Date (latest first)
- Filter by: All Categories, Specific Category

Past Events View:

Same card format as Upcoming, with modifications:

- "Attended on [date]" status text
- Primary action: "Leave a Review" (if not yet reviewed)
- Secondary action: "View Tickets" (access to past tickets/receipts)
- No cancellation option

Canceled View:

- Event details (same card format)
- Cancellation reason display
- Refund status:
 - "Refund Processed" (date and amount)
 - "Refund Pending" (processing time estimate)
 - "Non-Refundable" (with policy explanation)
- "Book Again" button if event has future dates

Empty States:

- Upcoming tab (no bookings): Illustration + "No upcoming events" + "Discover Events" CTA
- Past tab (no history): "You haven't attended any events yet"
- Canceled tab (none): "No cancellations"

Desktop Adaptations:

- Table view option for power users
 - Bulk actions available (export tickets, add multiple to calendar)
 - Filter sidebar always visible
-

4.10 Ticket Detail Screen

Purpose: Display ticket information for event entry, including QR code and event details.

Screen Layout:

1. Header:

- Event cover image (full-width banner)
- Back button
- Share button (share ticket with friend)
- Overflow menu (Download, Add to Wallet, Report Issue)

2. QR Code Section (Primary Focus):

- Large, centered QR code for scanning at entry
- Screen brightness auto-increase when viewing (iOS/Android API)
- Ticket number below QR code (for manual entry if needed)
- "Valid Ticket" status indicator (green check) or "Used" (if already scanned)

3. Event Details:

- Event name
- Date, time, and location
- Venue name and address (tappable for map)
- "Get Directions" button

4. Ticket Information:

- Ticket type (e.g., "VIP Pass")
- Ticket holder name
- Seat number (if assigned seating)
- Booking reference number

- Purchase date

5. Entry Requirements:

- What to bring (ID, confirmation email, etc.)
- Venue rules (no photography, dress code, etc.)
- Contact information for questions

6. Action Buttons:

- Add to Apple Wallet / Google Pay (prominent)
- Download PDF Ticket
- Contact Organizer
- View Event Details (returns to Event Detail page)

7. Help & Support:

- FAQs (expandable)
- Customer support contact
- "Report an Issue" link

Security Features:

- QR code is unique and encrypted
- "Screenshot Detection" warning (optional): "Don't share screenshots - share via app to prevent fraud"
- Dynamic QR code refresh option if security concern

Offline Functionality:

- Ticket data cached locally for offline access
- QR code remains scannable without internet
- "Offline Mode" indicator if no connection

4.11 User Profile & Account Settings

Purpose: Manage account information, preferences, saved items, and app settings.

Profile Tab Structure:

1. Profile Header:

- Profile photo (editable, with camera icon overlay)
- User name (editable)
- Email address (verified badge if confirmed)
- "Edit Profile" button

- "Share Profile" button (if social features enabled)

2. Quick Stats (Optional Social Feature):

- Events Attended count
- Reviews Written count
- Followers/Following count (if community features active)

3. Account Settings Menu:

Personal Information:

- Edit Name
- Edit Email
- Edit Phone Number
- Edit Date of Birth
- Change Password

Preferences:

- Language (Arabic/English toggle)
- Location (City selection)
- Event Categories (Select interests for better recommendations)
- Distance Radius (for "Near Me" results)

Notifications:

- Push Notifications (master toggle)
- Email Notifications (master toggle)
- Notification Types (granular control):
 - Event Reminders (24h before, 1h before)
 - Tickets & Bookings
 - New Events Near You
 - Events from Followed Organizers
 - Promotional Offers

Payment Methods:

- Saved Cards (masked numbers, edit/delete options)
- Add New Payment Method
- Default payment method selector

Privacy & Security:

- Privacy Settings (Public/Private profile)
- Data & Permissions (location, camera access)
- Download My Data (GDPR compliance)
- Delete Account

Support & Legal:

- Help Center / FAQs

- Contact Support
- Terms of Service
- Privacy Policy
- About EventHub (app version, company info)

App Settings:

- Dark Mode / Light Mode toggle
- Data Saver Mode (reduce image quality)
- Clear Cache
- Log Out

4. Saved/Bookmarked Events:

- Separate section or tab showing all bookmarked events
- Same card format as main feed
- Remove from saved option
- Empty state: "No saved events yet"

5. Following (Optional Social Feature):

- List of followed organizers
- Recent events from followed accounts
- Unfollow option

Desktop Web Differences:

- Settings displayed as sidebar + main content area layout
 - Breadcrumb navigation for sub-settings pages
 - More detailed forms (less need for modals)
-

4.12 Category Browse Screen

Purpose: Explore events by specific category with curated collections.

Screen Structure:

1. Category Header:

- Category icon (large, branded)
- Category name (H1)
- Category description (1-2 sentences)
- Background gradient or image matching category theme

2. Quick Filters (Specific to Category):

- Sub-categories (e.g., Music → Rock, Jazz, Classical, Electronic)
- Date filters (This Week, This Month, etc.)

- Price range
- 3. Featured Category Events:**
- Curated "Editor's Picks" for this category
 - Carousel of top events
- 4. All Events Grid/List:**
- Standard event cards
 - Infinite scroll
 - Sort options (Date, Popularity, Price)
- 5. Category-Specific Collections (Optional):**
- "Top Rated Music Events This Month"
 - "Free Music Events"
 - "Weekend Concerts"

Categories to Include:

Category	Icon/Visual Theme
Music	Musical note, vibrant colors
Sports	Ball/trophy, energetic reds/oranges
Arts & Culture	Palette, sophisticated purples
Food & Drink	Fork/knife, appetizing yellows/reds
Technology	Chip/circuit, modern blues
Family	Heart/people, warm oranges/pinks
Business & Networking	Briefcase, professional blues
Nightlife	Moon/star, dark purples/blacks

Table 5: Primary event categories

4.13 Login & Registration Screens

Purpose: Secure account creation and authentication.

Login Screen:

- App logo at top
- Headline: "مرحبًا بعودتك / Welcome Back"
- Email/Phone input field
- Password input field (with show/hide toggle)
- "Forgot Password?" link

- "Login" button (primary CTA)
- Social login options:
 - Continue with Google
 - Continue with Apple
 - Continue with Facebook
- Divider: "or"
- "Don't have an account? Sign Up" link at bottom

Registration Screen:

- Headline: "أنشئ حسابك / Create Your Account"
- Full Name input
- Email input
- Phone Number input (with country code)
- Password input (with strength indicator)
- Confirm Password input
- Date of Birth (optional, for personalization)
- Terms acceptance checkbox
- "Create Account" button
- Social signup options (same as login)
- "Already have an account? Login" link

Password Requirements Display:

- Minimum 8 characters
- At least one uppercase letter
- At least one number
- Visual checkmarks as requirements met

Forgot Password Flow:

1. Enter email address
2. "Send Reset Link" button
3. Confirmation: "Check your email for reset instructions"
4. Email contains temporary link
5. Reset password form (new password + confirm)
6. Success confirmation + auto-login

Best Practices Applied:

- Guest checkout available (no forced registration for first purchase)[11]
 - Social login reduces friction[12]
 - Progressive disclosure (ask minimal info upfront)
 - Password strength indicator increases security without frustration
-

4.14 Notifications Center

Purpose: Centralized hub for all app notifications and updates.

Screen Layout:

- Header with "Notifications" title
- "Mark All as Read" action (top-right)
- Filter tabs:
 - All (default)
 - Events
 - Bookings
 - Updates

Notification Types & Format:

Type	Content & Visual
Event Reminder	Icon: Calendar "Reminder: [Event Name] starts tomorrow at [time]"
Booking Confirmation	Icon: Checkmark "Your booking for [Event] is confirmed!"
New Event Alert	Icon: Star "New [Category] event near you: [Event Name]"
Price Drop	Icon: Tag "[Event Name] tickets now available at lower price"
Event Update	Icon: Info "Update from organizer: [Message preview]"
Review Request	Icon: Star outline "How was [Event Name]? Share your experience"
Cancellation Alert	Icon: Warning "[Event Name] has been canceled. Refund processed."

Table 6: Notification types and visual indicators

Notification Card Details:

- Icon matching notification type
- Bold title (unread) / Regular title (read)
- Message preview (2 lines max)
- Timestamp (relative: "5m ago", "Yesterday", "Jan 15")
- Unread indicator (blue dot or background tint)
- Swipe actions:
 - Swipe left: Delete
 - Swipe right: Mark as read/unread
- Tap action: Navigate to relevant screen (event detail, booking, etc.)

Empty State:

- Illustration of bell with checkmark
- "You're all caught up!"
- "No new notifications"

Settings Link:

- Footer link: "Manage Notification Preferences"
 - Opens notification settings in Profile
-

4.15 Help & Support Screen

Purpose: Provide self-service help resources and access to customer support.

Screen Structure:

1. Search Bar:

- "How can we help you?" placeholder
- Search FAQs and help articles
- Auto-suggestions as user types

2. Popular Topics (Quick Links):

- How to book tickets
- How to cancel a booking
- Refund policy
- Payment issues
- Can't find my tickets
- Contact organizer

3. FAQ Categories (Accordion):

- Booking & Tickets
- Payments & Refunds
- Account & Profile
- Events & Organizers
- Technical Issues
- Safety & Security

Each category expands to show list of questions, which expand to show answers.

4. Still Need Help Section:

- Email support button (opens email client or in-app form)
- Live chat button (if available - shows availability hours)
- Phone support (display number + hours)
- WhatsApp support (Egypt/Saudi specific)

5. Response Time Indicator:

- "Average response time: 2-4 hours"
- Support hours: "Sun-Thu, 9 AM - 6 PM GST"

6. Feedback Section:

- "Was this helpful?" thumbs up/down
- "Suggest an improvement" link

5. Component Library

5.1 Buttons

Button Type	Specifications
Primary	Solid fill, brand primary color, white text, rounded corners (8px radius), min height 48px
Secondary	Outline style, brand color border, brand color text, same dimensions
Tertiary	Text only, no border, brand color text, underline on hover
Disabled	Gray background, reduced opacity (0.5), no hover state
Icon Button	Square or circle, icon only, min 44×44px tap target
Floating Action	Circular, elevated shadow, bottom-right placement (mobile)

Table 7: Button component specifications

5.2 Cards

Event Card Variants:

1. Compact Horizontal Card:

- Small square thumbnail (left)
- Event details (right): name, date, location, price
- Width: Full screen width minus padding
- Height: 120px

2. Vertical Card:

- Rectangle image top (16:9 ratio)
- Event details below: name, date, location, price
- Width: 280px (for horizontal scroll)
- Height: 360px

3. Hero Card:

- Large landscape image (full width)
- Text overlay at bottom with gradient
- Height: 240px

Card Elements:

- Drop shadow: 0px 2px 8px rgba(0,0,0,0.1)
- Border radius: 12px
- Padding: 16px
- Hover state: Subtle scale (1.02) + shadow increase

5.3 Input Fields

- Border: 1px solid gray, 2px brand color on focus
- Border radius: 8px
- Height: 48px (single line), auto (multi-line)
- Padding: 12px horizontal, 14px vertical
- Label: Above field, 14px font, 600 weight
- Placeholder: Light gray, 16px font
- Error state: Red border, red error text below
- Success state: Green border, optional checkmark icon

5.4 Icons

Icon Set Requirements:

- Consistent stroke width: 2px
- Size variants: 16px, 20px, 24px, 32px
- Style: Outlined (default), Filled (selected states)
- Color: Match text color or brand primary
- Common icons needed:
 - Navigation: Home, Search, Calendar, User, Menu
 - Actions: Share, Bookmark, Filter, Sort, Edit, Delete
 - Status: Check, Warning, Error, Info, Clock
 - Social: Facebook, Instagram, WhatsApp, Twitter
 - Event types: Music note, Sport ball, Art palette, Food, Tech, Family

5.5 Typography Scale

Style	Size	Weight	Usage
H1	28px	700	Page titles
H2	24px	600	Section headers
H3	20px	600	Card titles
Body Large	18px	400	Prominent text
Body	16px	400	Default text
Body Small	14px	400	Supporting text
Caption	12px	400	Labels, timestamps
Button Text	16px	600	Button labels

Table 8: Typography scale specifications

Font Families:

- Arabic: Tajawal, Cairo, or Noto Sans Arabic
- English: Inter, Roboto, or SF Pro
- Monospace (codes): SF Mono, Roboto Mono

6. Visual Design Guidelines

6.1 Color Palette

Primary Brand Colors:

- Primary: Teal (#20C997 or similar) - Trust, modernity, energy
- Secondary: Deep Blue (#1E3A8A) - Professionalism, stability
- Accent: Vibrant Orange (#FF6B35) - Calls-to-action, highlights

Neutral Colors:

- Background Light: #FFFFFF
- Background Dark: #F8F9FA
- Text Primary: #212529
- Text Secondary: #6C757D
- Border/Divider: #DEE2E6

Semantic Colors:

- Success: Green #28A745
- Warning: Yellow #FFC107
- Error: Red #DC3545
- Info: Blue #17A2B8

Category Colors (for visual coding):

Category	Color
Music	Purple #8B5CF6
Sports	Orange #F97316
Arts	Pink #EC4899
Food	Red #EF4444
Tech	Blue #3B82F6
Family	Green #10B981
Business	Gray #6B7280
Nightlife	Indigo #6366F1

Table 9: Category color assignments

6.2 Spacing System

8-Point Grid System:

All spacing values should be multiples of 8:

- 8px (0.5rem): Tight spacing
- 16px (1rem): Default spacing
- 24px (1.5rem): Medium spacing
- 32px (2rem): Large spacing
- 48px (3rem): Section spacing
- 64px (4rem): Major section breaks

6.3 Imagery Guidelines

Event Images:

- Aspect ratios: 16:9 (landscape), 1:1 (square), 3:4 (portrait)
- Minimum resolution: 1200×675px for 16:9
- Format: JPEG (photos), PNG (graphics with transparency)
- Compression: Optimize for web, max 200KB per image

- Alt text required for accessibility

Photography Style:

- Authentic, candid moments over staged photos
- Diverse representation of people and cultures
- Bright, vibrant colors
- Clear focal point
- Avoid heavy filters or excessive editing

Placeholder Images:

- Use category-specific gradients + icons when no image available
- Never leave image areas completely blank

6.4 Iconography

Style:

- Outlined icons (2px stroke) for consistency
- Rounded corners and ends (2px radius)
- Filled variants for active/selected states
- 24×24px base size (scale proportionally)

Color:

- Default: Text color (black/dark gray in light mode)
 - Active: Brand primary color
 - Disabled: Light gray (40% opacity)
-

7. Interaction Patterns

7.1 Navigation Patterns

Mobile Navigation:

- Bottom tab bar (always visible except during full-screen experiences)
- 4-5 primary tabs maximum
- Current tab indicated by color + filled icon
- Tab labels in both Arabic and English (bilingual mode) or selected language

Desktop Navigation:

- Top horizontal navigation bar (sticky on scroll)
- Mega menu for "Browse" with category grid
- User profile dropdown in top-right
- Search bar always visible in header

7.2 Gestures

Mobile Gestures to Support:

Gesture	Action
Swipe left on card	Delete/Remove
Swipe right on card	Save/Bookmark
Pull down at top	Refresh content
Long press	Show context menu / Quick actions
Pinch	Zoom (maps, images)
Swipe left/right on image	Navigate carousel

Table 10: Mobile gesture interactions

7.3 Feedback & Micro-interactions

Visual Feedback Requirements:

- Button tap: Scale down slightly (0.95) + ripple effect
- Toggle switch: Smooth slide animation (200ms)
- Checkbox/Radio: Checkmark animation
- Loading: Skeleton screens (preferred) or spinners
- Success actions: Green checkmark animation + toast message
- Error actions: Red shake animation + error modal
- Pull-to-refresh: Custom animation with brand elements
- Image loading: Blur-up progressive loading

Haptic Feedback (Mobile):

- Light haptic on button press
- Medium haptic on toggle/switch
- Strong haptic on error or critical action
- No haptic on text input

7.4 Loading States

Skeleton Screens (Preferred):

- Show placeholder content structure while loading
- Animate with shimmer effect
- Match layout of actual content
- Use for: Event cards, profile data, lists

Spinners:

- Use for: Button actions, small data loads, searches
- Centered, with optional text below
- Size: Small (20px), Medium (40px), Large (60px)

Progress Indicators:

- Use for: Multi-step forms, file uploads, downloads
- Show percentage when possible
- Clear labels for current step

8. Responsive Design Breakpoints

Device	Breakpoint	Layout Adjustments
Mobile (Portrait)	320-479px	Single column, bottom nav, full-width cards
Mobile (Landscape)	480-767px	Optimize horizontal space, side-by-side elements
Tablet (Portrait)	768-1023px	2-column grids, expanded cards
Tablet (Landscape)	1024-1279px	3-column grids, sidebar navigation option
Desktop	1280px+	Max content width 1400px, multi-column layouts, sidebars

Table 11: Responsive breakpoints and layout guidelines

Mobile-First Approach:

- Design and develop for mobile first

- Progressively enhance for larger screens
 - Never hide critical features on mobile
 - Touch targets minimum 44×44px[13]
-

9. Accessibility Requirements

9.1 WCAG 2.1 AA Compliance

Color Contrast:

- Normal text (under 24px): Minimum 4.5:1 contrast ratio
- Large text (24px+ or 19px+ bold): Minimum 3:1 contrast ratio
- UI components and graphics: Minimum 3:1 contrast ratio

Keyboard Navigation:

- All interactive elements accessible via Tab key
- Logical tab order (top to bottom, left to right for LTR, right to left for RTL)
- Focus indicators clearly visible (2px outline, high contrast color)
- Enter/Space to activate buttons and controls

Screen Reader Support:

- Semantic HTML elements (header, nav, main, section, article, footer)
- ARIA labels for icon-only buttons
- Alt text for all images
- Form labels properly associated
- Dynamic content updates announced
- Loading states communicated

Touch Targets:

- Minimum 44×44px for all tappable elements[14]
- Adequate spacing between adjacent targets (minimum 8px)

Content Structure:

- Proper heading hierarchy (H1 → H2 → H3, no skipping)
- Descriptive link text ("View event details" not "Click here")

- Clear error messages with solutions

9.2 Internationalization (i18n)

Bilingual Support (Arabic/English):

- RTL (Right-to-Left) layout for Arabic
- LTR (Left-to-Right) layout for English
- Mirror all UI elements appropriately in RTL:
 - Navigation arrows
 - Back buttons
 - Carousel direction
 - Text alignment
 - Icon positions
- Keep numbers and dates in standard format (not mirrored)
- Use Unicode for proper Arabic text rendering
- Font selection: Arabic and Latin character support
- Date formats:
 - Egypt: DD/MM/YYYY
 - Saudi Arabia: DD/MM/YYYY or Hijri calendar option
- Time formats: 12-hour (with AM/PM) or 24-hour based on locale
- Currency:
 - Egypt: EGP (E£ or ج.م)
 - Saudi Arabia: SAR (SR or ر.س)

10. Performance Guidelines

10.1 Target Metrics

Metric	Target
First Contentful Paint (FCP)	Under 1.8s
Largest Contentful Paint (LCP)	Under 2.5s
Time to Interactive (TTI)	Under 3.8s
Cumulative Layout Shift (CLS)	Under 0.1
First Input Delay (FID)	Under 100ms
Page Size (Mobile)	Under 2MB
API Response Time	Under 200ms (p95)

Table 12: Performance targets

10.2 Optimization Strategies

Images:

- Lazy loading for below-fold images
- WebP format with JPEG fallback
- Responsive images (srcset) for different screen sizes
- Compression: 80-85% quality for photos
- Use CDN for image delivery

Code:

- Minify CSS and JavaScript
- Code splitting for faster initial load
- Tree shaking to remove unused code
- Cache static assets (30-day expiry)

Data:

- Pagination: Load 20 events at a time
- Infinite scroll with virtual scrolling for long lists
- Debounce search input (300ms delay)
- Cache API responses (5-minute TTI for event lists)

11. Platform-Specific Considerations

11.1 iOS Specific

Design Adaptations:

- Follow iOS Human Interface Guidelines
- Use SF Symbols for system icons where appropriate
- Implement native iOS components:
 - UIKit navigation bars
 - Native date/time pickers
 - iOS-style modals (bottom sheet)
- Haptic feedback using UIFeedbackGenerator
- Support for Dynamic Type (text size scaling)
- Dark mode support following system setting

- Face ID / Touch ID for payment authentication
- Apple Pay integration
- Add to Apple Wallet for tickets

Safe Areas:

- Respect notch and home indicator on iPhone X and newer
- Bottom tab bar above home indicator
- Content padding at top to avoid notch

11.2 Android Specific

Design Adaptations:

- Follow Material Design 3 guidelines
- Use Material icons
- Implement Material components:
 - Material toolbar
 - Material date/time pickers
 - Material bottom sheets
- Ripple effect on button taps
- Floating Action Button (FAB) for primary action
- Android navigation gestures support
- Support for font scaling (SP units)
- Dark theme support following system setting
- Fingerprint / Face unlock for authentication
- Google Pay integration
- Add to Google Pay for tickets

Navigation:

- Hardware back button support
- Back stack management

11.3 Web Specific

Progressive Web App (PWA) Features:

- Add to home screen prompt
- Service worker for offline functionality
- Push notifications (with permission)
- App-like full-screen mode

Browser Support:

- Modern browsers: Chrome, Safari, Firefox, Edge (latest 2 versions)
- Graceful degradation for older browsers
- Polyfills for critical features

SEO Optimization:

- Semantic HTML
 - Meta tags for social sharing (Open Graph, Twitter Cards)
 - Structured data for events ([Schema.org](https://schema.org) Event markup)
 - Dynamic meta titles and descriptions per page
 - Canonical URLs
-

12. Design Handoff Specifications

12.1 Design File Organization

Figma/Sketch File Structure:

EventHub_Design_System/

|— 00_Cover_&Index

|— 01_Foundations/

| |— Colors

| |— Typography

| |— Spacing

| |— Grid

| |— Buttons

| |— Cards

| |— Forms

| |— Navigation

| |— Modals

|— 03_Mobile_Screens/

| |— Onboarding

| |— Home&Discovery

| |— Search&Browse

| |— Event_Details

		— <i>Booking_Flow</i>
		— <i>Profile&_Account</i>
		— <i>Supporting_Screens</i>
	—	04_Web_Screens/
		— Desktop
		— Tablet
	—	05_Prototypes/
		— User_Flow_1_Event_Discovery
		— User_Flow_2_Ticket_Booking
		— User_Flow_3_Account_Management
	—	06_Assets_Export/

12.2 Developer Handoff Requirements

For Each Screen:

1. Annotated designs with measurements
2. Component specifications (padding, margins, font sizes)
3. Interaction states (default, hover, active, disabled, error, success)
4. Animation specifications (duration, easing, trigger)
5. Conditional logic (when to show/hide elements)
6. Copy/text content (final, approved)
7. Asset exports (all required sizes and formats)

Export Formats:

- Icons: SVG (vector)
- Images: PNG @1x, @2x, @3x for mobile; WebP for web
- Logos: SVG + PNG fallbacks

Design Tokens:

- Colors (hex codes)
 - Font families, sizes, weights, line heights
 - Spacing values
 - Border radius values
 - Shadow specifications
 - Animation timings
-

13. Testing & Quality Assurance

13.1 Usability Testing Checklist

Pre-Launch Testing:

- User flow testing with real users (minimum 10 participants per flow)
- A/B testing for critical flows (onboarding, checkout)
- Card sorting for information architecture validation
- Accessibility audit (automated + manual testing)
- Performance testing on low-end devices
- Cross-browser testing (all supported browsers)
- Cross-device testing (various screen sizes)
- RTL layout testing for Arabic
- Localization testing (both languages)
- Error scenario testing (network errors, edge cases)

13.2 Key Success Metrics

Usability Metrics:

- Task completion rate: >90% for critical flows
- Time to complete booking: <2 minutes average
- Error rate: <5% for form submissions
- Search success rate: >85% find relevant events

Engagement Metrics:

- App launch frequency
- Session duration
- Events viewed per session
- Bookmark/save rate
- Share rate

Conversion Metrics:

- Discovery to detail view conversion: >30%
- Detail view to booking initiation: >15%
- Booking completion rate: >70%
- Repeat booking rate

14. Future Enhancements (Post-MVP)

Phase 2 Features:

- Social features: User profiles, following organizers, friend recommendations
- Enhanced personalization: ML-powered recommendations
- In-app chat: Direct messaging with organizers
- Live events: Virtual event streaming
- Gamification: Badges, achievements for event attendance
- Group bookings: Coordinate with friends
- Waitlist: Join waitlist for sold-out events
- Event series: Season passes, recurring events

Advanced Filters:

- Accessibility filters (ASL interpretation, captioning, sensory-friendly)
- Sustainability filters (eco-friendly events)
- Dietary filters (vegan-friendly, halal food)

Enhanced Discovery:

- AR venue previews
- 360° venue tours
- Video previews of events
- Curator/influencer recommendations
